

# ALPES CAMBIUM

FEEL THE FOREST

The French specialist in organic and upcycled  
extracts of wild and forest plants

## CATALOGUE

ESSENTIAL OILS | FLORAL WATERS & HYDROSOLS | BLENDS

MADE  
IN FRANCE

## A RESPONSIBLE DESIGN

ALPES CAMBIUM develops, produces, and markets premium organic-certified essential oils derived from conifers in the French Alps.

Sourced primarily from the Auvergne-Rhône-Alpes region, our oils are crafted from carefully selected raw materials, harvested as close as possible to our production site in the Drôme, ensuring both quality and sustainability.

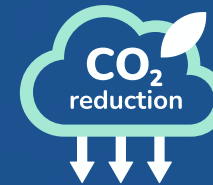

## SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

Preservation of biodiversity and sustainable management of natural resources

Promoting transparency and ethics in economic activities through upcycling

Carbon footprint study and compensation through reforestation (CO<sub>2</sub> storage)

Essential oils (unrectified):

100% PURE  
NATURAL  
COMPLETE

MADE IN  
FRANCE

# RAW MATERIALS / INGREDIENTS

100% pure, natural and complete essential oils (non-rectified)

Available packaging

kg 0.5 1 2 5 10 25 100 180

We adapt to your specific needs.

International deliveries available

under standard Incoterms

(EXW, FOB, CIF, etc.).

Ref.	Common Name	Organic*/ Conv.*	Origin	Distilled Part	Latin Name
HECA	Atlas Cedar		France/Morocco	Branches & needles	<i>Atlantic cedar</i>

# A SOCIALLY CONSCIOUS CONCEPT INNOVATION THROUGH UPCYCLING

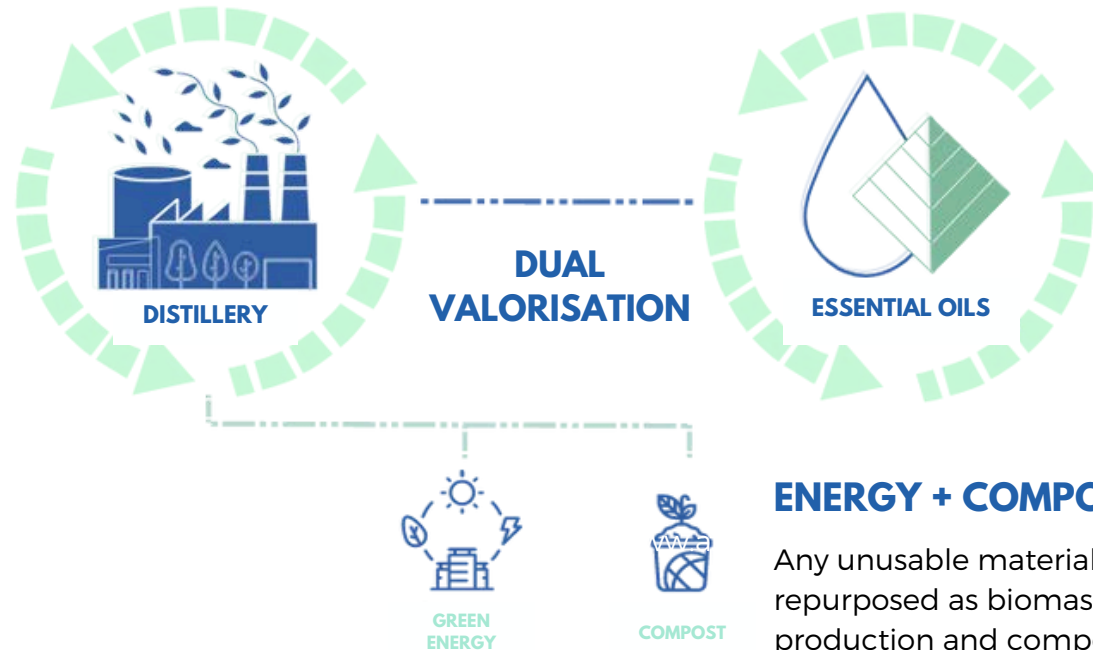

## WE HARVEST

ALPES CAMBIUM recycles conifer residues or remnants (branches and needles, etc.) from the forestry industry in the South-East of France, usually destined to be thrown away and/or abandoned.

## WE DISTILL

The branches and needles are distilled in the Drôme within 24 hours of harvest, ensuring optimal freshness and preserving their aromatic potency.

## ESSENTIAL OILS & FLORAL WATERS / HYDROSOLS

Rich in active ingredients, our essential oils are carefully packaged and ready for use, either in their pure form or as part of various formulations.

## ENERGY + COMPOST

Any unusable materials are repurposed as biomass for energy production and compost, ensuring a zero-waste approach.
